

Shotfirer Certificates

The EFEE Shotfiring Committee is working with the harmonization of the educational requirements for the shotfirer in Europe in order to enhance free mobility.

Educations in the EFEE-participating countries have been systematically analyzed by the committee to understand if their national educations meet the requirements set by EFEE. (See EFEE approved countries below.)

EFEE has issued more than 300 EFEE Shotfirer Certificates to applicants holding a national shotfirer license from a country which is considered to meet the set EFEE requirements.

An EFEE Shotfirer Certificate is only issued to shotfirers holding an approved national shotfirer license but does not automatically leads to that a shotfirer is approved to carry out his profession in European countries. However, national authorities in many countries tend to speed up the process of approving the shotfirer when he holds an EFEE Shotfirer Certificate.
